Additional Alumadoor Specifications

Panel Design: Recessed 90 Degree inset laminated glass panels for crisp detailed Alumadoor Look.

Frame: 6063 T5 extruded aluminum alloy with Integrated internal strut, (all doors 10' & wider) allows for additional backroom and headroom clearance over external strutted doors. Provides esthetically pleasing interior while maximizing garage depth and overhead clearance for larger sedans and SUV's.

Frame Design: Dedicated wide top and bottom rails allow for proper top rail reveal even on undersized height openings. Wide end stiles help accommodate undersize width openings.

Section Joints: Tongue & Groove meeting rail design.

Bottom Seal: Heavy duty exterior grade vinyl weather seal with exclusive adjustable internal spacers allows for custom fit to uneven garage slabs.

Glazing: Standard 1/4" tempered glass in clear or 1/4" laminated glass in black or white tint. Custom glazing is available upon request.

Finish: Clear, black and bronze anodized aluminum frame finishes are standard. Custom powder-coated finishes available upon request.

★ **NEW** woodgrain finishes available in Cedar, Fir, Mahogany & Walnut. Heritage T&G woodgrain finish options coming soon!!

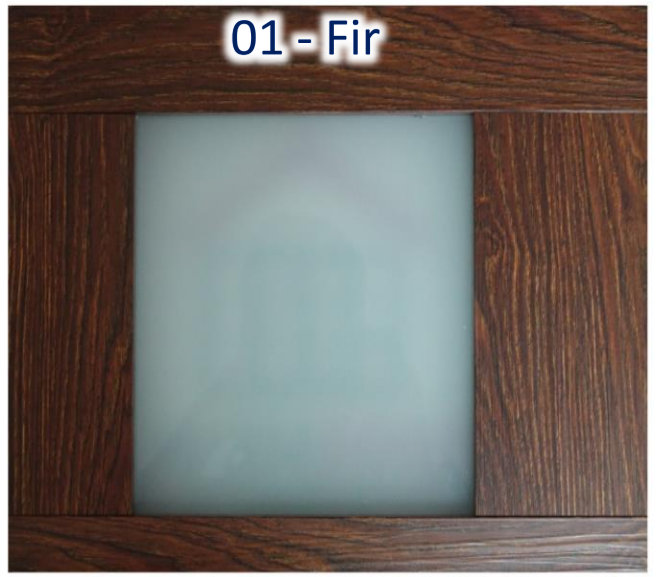

Sizes: Standard sizes 8, 9, 16 wide in 7' and 8' high. Custom widths and heights to your specifications are available upon request. Allow minimum 4-6 weeks lead time for all non stock orders.
